NRO REVIEW COMPLETED

COR 1106
Copy / of 4 copies
7 April 1961

MEMORANDUM FOR: Chief, TIBD
THROUGH: Executive Director

25X1A

SUBJECT: Trip Report - [REDACTED]
24 March 1961

1. PURPOSE: To visit Itek to ensure that [REDACTED] had all the camera design parameters of the C''' and E-5 camera systems necessary for computer programming and exploitation.

25X1

2. GENERAL:

25X1A

a. C''' Camera System - Discussion with [REDACTED]

- (1) The basic changes affecting computer programming and exploitation are the changes in the V/H programmer and format.
- (2) IMC is similar to that provided on the C and C' systems, except the sweep is in the opposite direction and the appropriate constants are different. Actual constants are available in TIB.
- (3) Timing pips will remain at 160 CPS, but will be clearer and a pulse extinction system will be used.
- (4) The same digitote used on C and C' systems will be utilized on the C''' system.

25X1A

b. E-5 Camera System - Discussion with [REDACTED]

A few specifications:

Camera type
Lens
Format size

Panoramic
66" f 5.0
4.5"x25" + data block (machine
readable)

TOP SECRET

This document contains information
referring to the [REDACTED]

TOP SECRET

COR 1106

Stereo overlap	10% in vertical - continuous mode
Design altitude	155 NM
Film load	26,000' to 52,000' on thin base film
Orientation data	Provided to $\pm .1^\circ$
Useful life	Up to 30 days
Timing pips	128 cps
Modes	$0^\circ - 15^\circ - 30^\circ$ roll, with continuous or burst operation
Time	To 1/10 second

3. RECOMMENDATION: It is recommended that NPIC secure several copies of the booklet described below and the classified supplements in order to better prepare for E-5.

"Itek Achievements in Aerial Panoramic Photography", dated
10 June 1960. ISM 60 (s) 1260
